TOTAL				18+		

Students complete six courses (18 credits): two core courses and four other elective classes from the list below. The electives are divided into "R" (digital research) and "P" (project presentation) courses, and students must take at least one of each kind. Some courses can satisfy either requirement but cannot satisfy both simultaneously. The two other courses may be any from the list below, or another course subject to approval by the faculty committee supervising Digital Studies.

Students in any major can complete many of their General Education requirements using courses that fulfill the Digital Studies Certificate. These are noted below in the list of electives; in addition, the core Digital Storytelling 1 course satisfies **Gen Eds: HM, Q2**. See also the last page of this document.

<sup>1</sup> HIST 1030 is a cross-listing of HUMAN 1030/SOCSCI 1031; the only difference is that students enrolled as HIST must work on a historically-themed project. While all three classes have different official catalog titles, they are known unofficially and collectively as "Coding and Digital Archives". This class is typically taught in the fall.
