

# INTERNSHIP SPOTLIGHT

## Myles Butler

**Graduation Semester & Year:** Spring 2025

**Semester & Year of Internship:** Summer 2024

**Major:** Data Analytics

**Minor:** Computer Science

**Hobbies:** Building Legos, going on fun adventures with family and friends, listening to music

**Campus Activities:** Attending events on campus such as Big Bang, Blue & Gold Celebration, CA events

**Future Plans/Career Goals:** Finish out my degree at Pitt and get a well-paying job that I enjoy

**Hometown:**

Pittsburgh, PA

- **Internship (company/your title):**  
Lucasfilm/Disney, IT Intern
- **How did you find your internship?**  
I found my internship through their company website
- **What were your duties?**  
There were a lot of experiences I encountered while at this internship. The main projects I worked on were reimagine computers and calibrating monitors, reshuffle project which was just helping my coworkers set up desks for new employees and other interns throughout the company. I also helped to setup an entirely new environmental monitoring system in their data center.
- **How many hours per week were you at your internship site?**  
I worked about 40 hours per week.
- **What did you enjoy most about your internship?**  
Getting to meet and work with so many different people in different positions, getting to know all the other interns and forming new friendships with them, all the benefits of working for a Disney company (premier screenings, meet and greets, etc.).
- **What was the most difficult aspect of the internship?**  
Learning how a data center works and troubleshooting why a big part of one of my projects was not working.
- **How did your experience at UPG and in the Information Technology department prepare you for your internship?**  
A lot of the skills I learned from Pitt Greensburg helped me with my internship. Since it was an IT internship and I'm a Data Analytics major, some of the competencies I learned from school did not transfer over, but a lot of the basic skills did and it made a huge difference.
- **How has your internship prepared you for a career?**  
I have learned a lot of new skills and techniques that will be very useful in my future (project management, documentation, organization, etc.).
- **What recommendations do you have for other students about doing an internship?**  
Don't be scared to ask questions if you don't understand something; these people are here to help guide you and teach you. Also, talk to as many people as you can. Whether they're in your department or not, people like talking about what they do and it could lead to learning about a career you didn't even know existed and that you really enjoy.

*By checking this box (or initialing next to it) and emailing this document to the campus Internship Coordinator, I give permission to University of Pittsburgh Greensburg to utilize this document along with the photo provided in media publications such as the UPG website, campus bulletin boards, and additional media outlets.*
