LEARNING DOMAIN

To be appropriately diagnosed, learning disorders require the expertise of a psychologist, neuropsychologist, or other related professional with experience and expertise in the area for which he/she is diagnosing a disability. When submitting documentation for a learning disability, please confirm with your examiner that the following six elements are included in the report.

1	Testing necessary to substantiate a learning disability must be comprehensive. Cognitive functioning in the following domains must be assessed by one of the following instruments: Aptitude
	Wechsler Adult Intelligent Scale-IV (WAIS-IV)
	Woodcock-Johnson Psychoeducational Battery-Revised: Tests of Cognitive Ability (WJ-R)
	Achievement Current levels of functioning in reading, mathematics, and written language are required.
	Woodcock-Johnson Psychoeducational Battery-Revised: Tests of Achievement
	Stanford Test of Academic Skills (TASK)
	Scholastic Ability Test for Adults (SATA)
	 Wechsler Individual Achievement Test (WIAT) or a combination of specific achievement tests such as: Test of Written Language-2 (TOWL-2) Woodcock Reading Mastery Test Revised Stanford Diagnostic Mathematics Test Nelson Denny Reading Test
	Information Processing Specific areas of cognitive processing must be assessed
	☐ Wechsler Adult Intelligent Scale-IV (WAIS-IV)
	Woodcock-Johnson Psychoeducational Battery-Revised: Tests of Cognitive Ability
	Halstead-Reitan Neuropsychological Battery
2.	Testing must reflect adult status (18 years and over) and is considered valid if administered within the last five years.
	☐ Yes
	□ No
